

Alta Refrigeration, Inc. is a full service industrial refrigeration constructor of field erected systems.

Since 1975, we have developed partner relationships with our customers. It is our goal to exceed their expectations and build a relationship on trust and repeat business.

Our job does not end upon project completion. We will continue to provide support to our customers and meet their needs as requested. We are committed to provide:

- Qualified service technicians
- Planned maintenance and inspection programs
- Technical support
- On-site training
- Replacement parts
- Budgeting of future projects

Alta has been designing and installing ammonia refrigeration systems for over 30 years without any litigation for non-performance or accidents.

ALTA REFRIGERATION

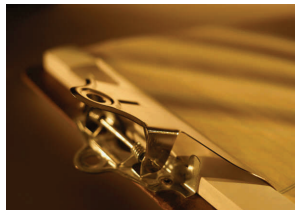

ALTA's service team is non-union and staffed with experienced service technicians who are factory and industry trained in all aspects of industrial refrigeration systems, equipment, and controls. Our technicians provide the best quality service in preventative maintenance, emergency service, repairs, and retrofits for all systems. Our service is performed on a timely basis with minimum system down time and interruptions.

24-HOUR SERVICE

Our service technicians are available **24 hours a day, 7 days a week** and are highly trained in all aspects of refrigerating equipment.

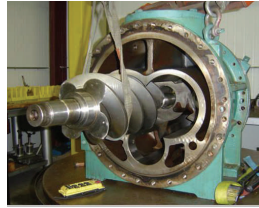

PREVENTATIVE MAINTENANCE

ALTA offers custom **Preventative Maintenance Contracts** designed to meet any customer's system requirements. On a prearranged schedule, an experienced service technician will inspect and maintain your system. ALTA's preventative maintenance program is cost effective and will help troubleshoot problems before they occur. Whether it is monthly inspections or a **Full Service Contract**, ALTA has the right program for you.

COMPRESSOR REBUILDING SHOP

We also have a complete Compressor Rebuilding Shop capable of handling any size or make of compressor. Our technicians are well qualified in giving you a factory spec rebuild, which can be performed in your plant or in our **compressor rebuilding facility** by factory trained and certified technicians.

PARTS DEPARTMENT

ALTA is committed to maintaining an **extensive inventory of refrigeration parts and supplies**. If the parts you need are not in stock, they will be available on short notice – one day in most cases. Most manufacturers accessories and components are in stock or are available at competitive prices.

We accept  

TECHNICAL SUPPORT WARRANTY/CLAIMS

ALTA Refrigeration is dedicated to giving customers the best service with world class support. **Our personnel will assist you** to make sure your refrigeration system operates at its fullest potential.

SAFETY & TRAINING

Safety is a top priority. ALTA provides Risk Reduction strategies that customers can supplement with their own risk management plan. ALTA will help your business reduce risk by:

1. Locating piping and valves outside of refrigerated space and on the roof.
2. Providing critical safety controls.
3. Designing systems with higher working pressure.
4. Reducing refrigerant charge by 50%.
5. Minimizing refrigerant charge stored at high temperature/high pressure.
6. Increasing equipment room ventilation.
7. Providing 100% ventilation back-up.
8. Minimizing the use of flanged or gasket connections.
9. Provide training to local Emergency Response (HAZMAT) personnel.
